To Whom It May Concern:

The following is a list of properties that may have been damaged by the August 2007 flood. These properties are either substantially damaged or the property owner has yet to submit information regarding the amount of damage that may have occurred so that a damage determination can be made by the City of Findlay. None of these structures have been issued a Flood Development Permit for repairs. Any person, corporation, partnership, or other entity that purchases this property containing structures that may have sustained flood damage is responsible for the permit and repair requirements. These properties may be denied water service until the damage determination has been made and the permit has been issued. This list will be updated on the City of Findlay website at [www.ci.findlay.oh.us](http://www.ci.findlay.oh.us).
